# Infor Process Intelligence—Process Modeler

Collaborative process design

Infor® Process Intelligence's Process Modeler is a cloud-based business process management solution designed to capture and design unique operational processes that can improve business efficiency by standardizing process models. Leveraging Infor's unique shared platform, users can collaborate with key stakeholders to modify, improve, and create new business processes to maintain consistency and alignment across the organization. Built to support current business practices, Infor Process Modeler delivers company-wide visibility to operations that helps facilitate increased levels of efficiency and effectiveness.

Infor Process Modeler is the underlying product on which the various Infor Industry Process Catalogs are built. An Industry Process Catalog consists of leading industry-based business processes, organizational roles, application configuration, and supporting materials, which are all built on the latest version of applicable Infor CloudSuite® industry solutions.

Infor Industry Process Catalogs are designed to deliver core industry application processes that help reduce implementation times, risk, and cost for customers. With Infor Process Modeler, you can leverage your licensed Infor Industry Process Catalog content to extend existing Infor Industry Process Catalog business processes and create new processes to meet your organization's needs.

## Use Infor Process Modeler to:

- Extend the Infor Industry Process Catalogs' business process models to include your organization's differentiators and unique process characteristics.
- Create engaging process maps and connect business process models to help users visualize and interact with the content in a dynamic format.
- Standardize process models with built-in universal Business Process Modeling Notation modeling conventions.

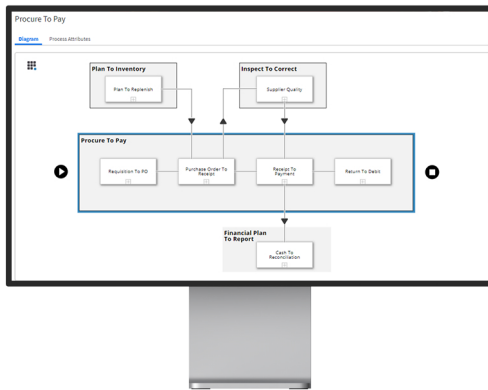

## Put your organization on the path to operational excellence

### Using data to make better decisions

With Infor Process Modeler, you can build an environment that aligns operational data with process management, turning static process models into dynamic and responsive dashboards that inform and guide you to make better business decisions.

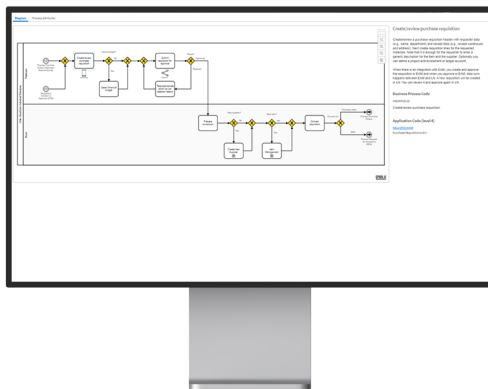

Infor Process Modeler is an intuitive solution that helps business users quickly start modeling business processes for the organization. Furthermore, users can share process models with their colleagues to help facilitate a transparent and collaborative environment.

### Procure-to-pay process map

Process Modeler is an intuitive solution that helps business users quickly start modeling business processes for the organization.

### End-to-end business process with app integration

Process Modeler allows you to drill into the application screen/session/form from the process activity.

### Infor Process Modeler delivers:

- Multilevel process modeling
- Ability to easily reuse registered content
- Process workflow access into Infor ERP solutions
- User configuration and content management capabilities
- Import/export capability across tenants
- Centralized documentation with Infor Document Management
- Cloud-based process management technology that eliminates the need to maintain costly on-premises storage solutions

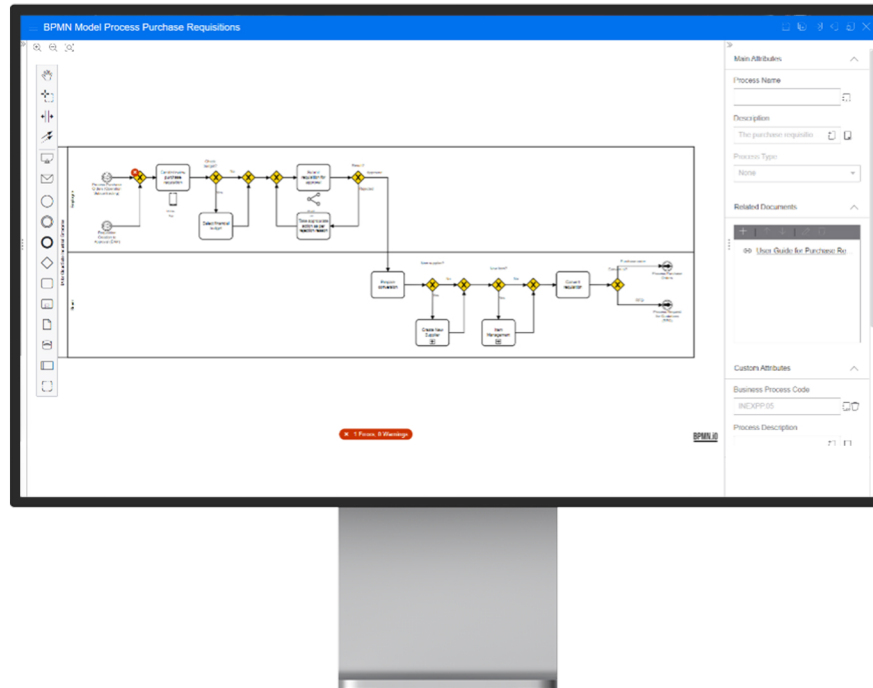

Leveraging our process map capability, you can map the way you interact with your business from an outside-in perspective. This visibility allows you to modify processes that help in your organization's overall transformation journey.

## Unlock the potential of your business processes

### Streamlined business and IT alignment

Infor Process Modeler supports business transformation by providing key stakeholders with complete transparency into the effect of organizational processes across the business. Your organization will be able to identify barriers to success and address business silos, conflicting priorities, diluted or duplicated efforts, and employee resistance to change.

## Modifying end-to-end business processes

Process Modeler lets you integrate your process models with every part of your business.

### Connected process models

While process models on their own can show how a business works, when these models are integrated, a complete and single version of the truth is identified. Infor Process Modeler enables you to integrate your process models with every other part of your business, from customer journeys to risk management, decision-making, capacity planning, IT implementation, and more.

### Accelerated capabilities

To improve performance and better compete in the marketplace by providing a higher level of customer service, your business should understand how your processes are performing on an ongoing basis. You need to take every opportunity to improve by monitoring execution, identifying bottlenecks, and improving overall operational efficiency.
